how do you come up with the idea to list all the birds in the world including the subspecies and to give all birds english names there is a reason for it my favorite saying whose author is unknown everyone said that s not possible then there was one who did not know that and just did it i am an animal photographer and probably a little bit crazy i ve built a complete animal database for

mammals and birds over the last decade this facilitates my work in determining and archiving images and assigning keywords especially among the many subspecies with this book i would like to give all birding friends and ornithologists a complete overview in english for this i have given unique english names to all subspecies the naming should not meet any scientific requirements the names are based on translations from the latin name geographical distribution areas and the names of the discoverers the entries consist of the scientific name the english name the distribution areas and the author i wish you a lot of fun with this book but especially while watching the fascinating birdlife fotolulu

cats exceed dogs in their numbers as companion animals in the u s and much of europe despite them not filling working roles in the past their prowess as mousers on farms sometimes made them essential but these days many cats lead leisurely lives in people s homes what accounts for them becoming such appreciated family members what are their behaviors that are so enticing exactly how do they respond to us when are they preferred companion animals more than dogs what do we know about cultural differences in views about cats their growing popularity and the relative paucity of data about owned cats living in homes emphasizes the importance of monitoring their welfare the anthrozoological research literature on companion animals includes extensive studies of dogs while contributing relatively few close looks at the special behaviors and traits of domestic cats that make them so desirable as companions we know little about the dynamics of our interactions with cats and the attachment shared with them which may differ in some ways for those we have with dogs nor have we identified the specific contexts where cats are particularly or uniquely compatible how does the type of attachment affect and shape the bond relationship between human and cat how are cats as emotional support animals for people with special needs especially autism what new information do we have about the cognitive abilities of domestic cats and how these abilities shape cats behavior and relationships with humans how do

early life experiences of cats influence their behavior as adults or their successful integration into human households do cats fit best in certain residential settings or with specific types or ages of people this research topic provides an opportunity to update our understanding on the special qualities and behaviors of cats and to scrutinize our mutual interactions with these companions
